

The Code for Sustainable Homes and Regulatory Update - masonry sector

Author: Graham Thompson<editor@masonry.org.uk>

The Society is co-operating with the Royal Institute of Chartered Surveyors to put on a series of seminars in different parts of the country dealing with the Code for Sustainable Homes.

The aim is to give delegates an overall feel for the Code of Sustainable Homes, but to show how to use masonry construction to achieve credits and therefore points in the Technical Guidance to the Code.

There will also be update for delegates on the latest changes to the Building Regulations and future proposals.

The venues will be:

Bolton - Reebok Stadium - 3 October 2007

London - RICS HQ - 16 October 2007

Coventry - Ricoh Arena - 20 November 2007

Southampton - St Mary's Stadium - 22 November 2007

The programme will include:

The Code for Sustainable Homes & Technical Guidance

Michael Driver, Brick Development Association

Part L-Improved Linear thermal bridging using Masonry

Ros Holleron, BRE?

Robust Details Part E

Simon Bloodworth, Robust Details Limited

Green Guide Ratings

Colin Marshall, Tarmac Topblock

Masonry Basements

John Roberts, Technical Innovation Consultancy

Energy Saving with Thermal Mass of Masonry

Tom de Saulles, British Cement Association

Flood Resistance and Resilience of Masonry

Carl Sutcliffe and Guy Thompson, The Concrete Centre

Update on Building Regulations

David Smith, RICS
