

Masterclass - New Stone Bridges

2 March 2022

Free online event

Wednesday 2 March 2022
15.00-18.00 GMT

Draft programme

Stone bridges proved to be sustainable and resilient over thousands of years.

The time has now come to utilise digital technology and update stone for the 21st century construction.

The masterclass will showcase a fascinating construction project in Tanzania and explore opportunities for reintroducing stone bridges around the world.

The New Stone Bridges Network will be launched and open for anyone interested.

*Stone was once considered old-fashioned.
The New Stone Age will be cutting edge.*
