

Webinar invitation:

Smart homes and innovation in the housing sector

The demand for housing is greater and more diversified than ever, stimulating innovation across a range of areas to help improve the way we build, live, invest and sustain. This webinar will address how innovation is driving change in the housing market across a number of themes such as smart homes, low carbon living, shared living, modern build methods and connected living, including the incorporation of new technologies, such as sensors, smart systems and materials.

To bring this topic to life, we have the following speakers:

- Ilke Homes – Dave Sheridan, Executive Chair, will discuss how Ilke Homes are pioneering the future of homes, creating beautiful, sustainable spaces built to last through modern manufacturing processes.
- Chameleon Technology is a pioneer in smart energy technology. Jennifer Woodhall, Marketing and Communications Director will explain how energy data will enable and optimise both smart home and low carbon technologies.
- H&H, the largest manufacturer of aircrete blocks and systems, are innovating to improve thermal performance of homes. Cliff Fudge, Director of External Affairs, will provide a high-level overview of how modern building products support energy efficient homes of the future.
- The National House Building Council (NHBC)– Richard Smith, Head of Standards, Innovation and Research, oversees NHBC’s analysis of modern methods of construction systems and offsite prefabrication, as well as the NHBC Foundation’s research and guidance activities. Richard will provide insight into future trends.
- Clarion – Christian Hellmund, Partner – Energy and Projects, will provide a high-level overview of how renewable energy solutions in conjunction with EV/ battery storage are playing a role in achieving net zero in housing.

When:

Tuesday 9 March 2021
